

Lobster

(*Homarus americanus*)

Our North Atlantic Lobster (*Homarus americanus*) is trapped in the icy waters off the coast of Canada's Maritime Provinces and the New England Coast. Canadian Lobster is usually harvested between April and December whereas the USA Lobster is harvested between July and December, thereby giving our customers the availability of a constant supply. Our customers know the Canadian hard-shelled Lobster for its superior taste and texture, considered by many to be the best in the world.

Barry Group Inc has unique, highly automated processing facilities located in New Brunswick, Canada. Our plant's designs incorporate leading edge technologies and processes. We have established our presence as one of North America's leading processors of Lobster Products.

To insure that we produce the highest quality products, we combine a dedicated and experienced work force with a quality assurance program and an integrated management system. We pursue our commitment by developing new and innovative product packs that meet the customer needs and food requirements of a dynamic market.

Our plants are HACCP approved by the USA Food and Drug Administration.

We specialize in brine, blast, and alcohol freezing processes, and we produce the following products according to graded specification:

Whole Cooked Fresh
Whole Cooked, Net Style (Baby Boils)
Scored Claws and Arms
Raw Tails
TCKL- Tails, Claws, Knuckles and Legs
CK- Claws and Knuckles

Whole Cooked in Brine (Popsicles)
Splits
Claws and Arms
Raw Easy Cut Tails
CKL- Claws Knuckles and Legs
L- Leg Meat

The Barry Group's Lobster plants will also provide products according to buyer and regulatory specifications. This is accomplished through inspection efforts that evaluate the current processing, and product handling methods. Our Customer specifications are achieved through end-product inspections, employing our in-plant quality management program. We currently supply food chain stores and institutions under a wide variety of labels.
